22 February 2010

To our valued customers,

Recently you may have noticed that Robar has changed the product numbers with our Wide Range coupling, the Vantage. The original product number for the Vantage was in our 1800/1900 family of couplings. Our new product numbers for the Vantage are in our 1400/1500 coupling family. The gasket that will be supplied with the Vantage also will be a SBR instead of the former NBR, this too was done to keep up consistency with the current 1400/1500 series couplings.

As with all of our product lines, various compounds of gasket materials are readily available from Robar depending on your specific application, just specify your application if not used for potable water.

If you have any further questions regarding this matter please contact your local sales representative or contact our sales offices in Surrey BC or Boucherville Quebec.

Sincerely,

Dave Brewer
Waterworks Sales Manager
