

STEEL COUPLINGS AND EXPANSION JOINTS

Together with Baker Coupling Co, we offer proven quality and service for all types of fabricated couplings and expansion joints. Whether you require a large diameter coupling for your penstocks or an expansion joint for a bridge crossing, Robar can supply your needs.

Couplings

Model number 1808/1906

Using our fabricated couplings from sizes 2" to 24' in diameter, with or without M-11 pipe harness, there are few pipes or pipe sizes Robar cannot couple.

Expansion Joints

Model number 8808/8906

Using our extensive experience, whether supplying expansion joints for a bridge crossing or a large diameter penstock for a hydro-electric project, Robar gives you the confidence you'll get what you need.

Flanged Coupling Adapters

Model number 7808/7906

Our flanged coupling adapters are available with all classes of flanges, including ANSI, ASME as well with reducing barrels. Available in sizes 3" to 120".

FOR ALL YOUR FABRICATED STEEL COUPLING NEEDS

Tapping Sleeves

Model number 6828/6926

We also offer tapping sleeves for high pressure applications or Concrete Cylinder Pipe, available in all sizes and flange sizing in accordance with AWWA 207.

Tapping Sleeves

Model number 6996

STEEL COUPLINGS AND EXPANSION JOINTS

Applicable standards and description for fabricated product

Item	Product Number	Product Description	Material	Specification, Standards
1	1808/1906	Couplings	*Carbon Steel	ASTM A-36, AWWA C210/213, AWWA C 111
2	7808/7906/DMJ	Flanged Coupling Adapter	*Carbon Steel	ASTM A-36, AWWA C207, AWWA C210/213, AWWA C111
3	8808/8906	Expansion Joints	*Carbon Steel	ASTM A-36, AWWA C210/213, AWWA C 111
4	6828/6926/6996	Tapping Sleeves	*Carbon Steel	ASTM A-36, AWWA C207, AWWA C210/213, AWWA C111

*stainless steel available on request

Baker Coupling's history of supplying couplings and expansion joints for over 50 years, gives you the peace of mind that the design and materials will meet or exceed all applicable standards in the industry today.
